El-Nino

ABOUT EQWE CARE:

At EqWe, our mission is to provide equal, quality and uninterrupted health care for the deprived and distressed sections of the society.

Our applications are strategically made to ensure immediate assistance to emergency patients by providing a one click consolidated summary of difficult to access historical medical reports. Additionally, we understand the inadequate care that people rely on due to lack of awareness on affordable insurance programs.

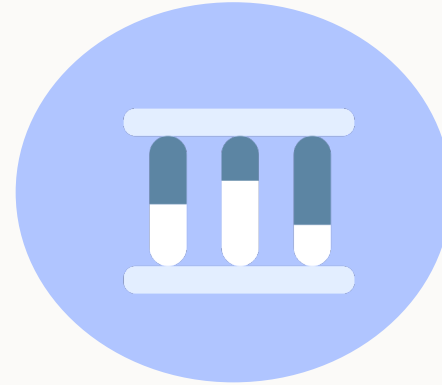

So, through our platform we provide well assessed insurance programs that maximizes benefits at surprisingly affordable plans. As service provider and SaaS platform we bridge the unfortunate health care gaps.
